

MSH

January 18, 1917.

Pioneer Packing Co.,

Aberdeen, Washington.

Gentlemen:

On January 3, 1917, your report of operations at Cordova, Alaska, for the season of 1916 was returned for you to insert certain additional information as to the rig and tonnage of the vessel operated, and the amount and value of product at your cannery. This corrected report was received to-day, but it is still incomplete in that it does not show the number of cases packed or the value per case, or as a whole. The report shows that 59,379 pounds of clams were handled, valued at \$742.25. This is assumed to be the amount paid to the diggers, and in no sense represents the value of the pack.

To complete your report it is necessary that you submit a statement showing the number of cases of clams canned, according to size or weight of cans used, the manner of canning, that is, whether whole or minced, and the total value of each class of product. Please give this matter prompt attention.

Very truly yours,

H. M. Smith.

Commissioner.
